

Denta Guard

Your practical guide
to transforming your
oral routine with small
actions and big results.

Your oral health deserves attention, balance and daily care. And this change starts now

YOU ARE NOT HERE BY CHANCE.

Choosing **DentaGuard** is much more than taking care of your teeth and gums — it is a commitment to your overall health, your self-esteem and the well-being you deserve. It is smiling with more confidence, feeling sure that you are doing the best for yourself.

DentaGuard was developed especially for you.

It is not just a supplement — it is a daily ally, formulated with carefully selected ingredients to strengthen your oral health, protect sensitive gums, help prevent cavities and maintain the balance of oral flora.

You are not alone on this journey. With each capsule, you are closer to a healthy mouth, a more beautiful smile and a better quality of life. We are here with you, offering support, guidance and the care you need to make your experience with DentaGuard transformative. Believe me: taking care of your oral health is an essential step towards a healthier, more confident and rigorous life.

Welcome to the new. Welcome to the care that transforms your smile — and your life.

Welcome to your new oral care routine!

Congratulations on choosing DentaGuard!

You are taking an important step towards strengthening your oral health and taking care of your smile more safely, effectively and naturally. **DentaGuard** was developed especially for people like you, who understand the importance of a healthy mouth and want practical and reliable support to achieve this goal.

With carefully selected ingredients, **DentaGuard** works to strengthen teeth and gums, combat inflammation and help prevent cavities and other oral problems. And best of all: it can be easily integrated into your daily routine!

How to Use DentaGuard

Recommended Dosage:

- Take 1 capsule per day.

How to Take:

With a glass of water, preferably after a meal.

Ideal Time:

Choose a fixed time of day (such as after breakfast or dinner) to ensure consistent use.

Consistency is Key:

Daily use is essential to achieve the desired results. Don't skip days!

Good Practices to Enhance Results

In addition to taking DentaGuard, adopting healthy habits reinforces the effectiveness of the product and keeps your oral health up to date:

- **Proper Brushing:**

Brush your teeth at least twice a day, using toothpaste with fluoride. Use gentle, circular movements.

- **Dental Flossing is Essential:**

Use dental floss every day, especially before bed, to prevent plaque buildup between your teeth.

- **Visits to the Dentist:**

Have regular check-ups and professional cleanings every 6 months.

- **Smart Eating:**

Prioritize foods rich in calcium and vitamin D, such as milk, cheese, broccoli and eggs. Avoid excess sugar and very acidic foods.

Extra Tips for a Healthy Smile

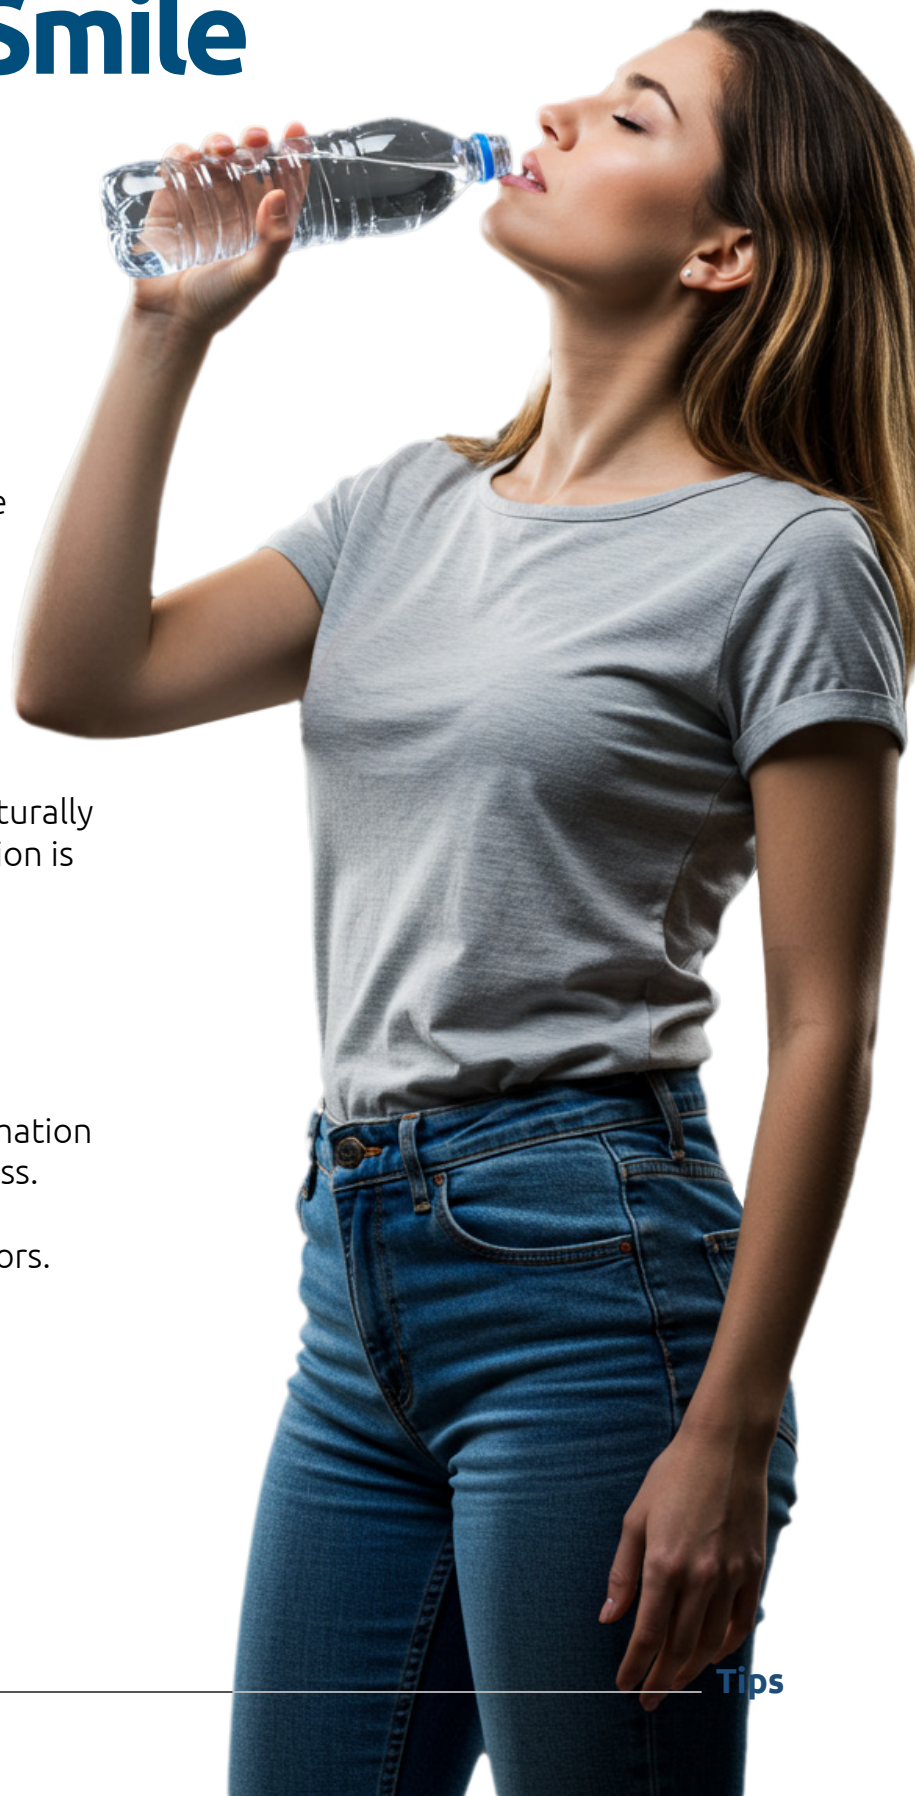

- **Avoid Sugars and Acids:** Reduce your consumption of soft drinks, sweets and processed juices. These foods wear down tooth enamel and increase the risk of cavities.

- **Drink Plenty of Water:** Saliva naturally protects your teeth. Proper hydration is essential for its production.

- **Manage Stress:** Bruxism, inflammation and mouth ulcers are linked to stress. Practice relaxing activities such as meditation, yoga or walking outdoors.
